Invitation: Enhancing Patient Safety Demo

Tuesday 14th October 2014, 5:30pm

Poster Area, BAPEN Exhibition Hall

Hosted by:

with guest Tom Hancock, Executive Director, GEDSA

In order to comply with the international standard (ISO 80369-3), a new global enteral feeding device connector design (named ENFit) is planned to be introduced throughout the UK from September 2015. ENFit is a unique enteral specific designed connector that significantly reduces the risk of a misconception to any other type of medical device.

Find out more

To find out more, be the first to see the prototype devices and have a unique opportunity to discuss the impact on your patient care come along. Your feedback will be greatly appreciated.
